

[Your Full Name]

Junior IT Support Specialist | Google IT Support Professional Certificate Candidate

Cape Town, South Africa | yourname@email.com | +27 XX XXX XXXX | linkedin.com/in/yourprofile |
github.com/yourusername

PROFESSIONAL PROFILE

Motivated and detail-oriented IT Support candidate with foundational knowledge in hardware, networking, operating systems, and cybersecurity, gained through the Google IT Support Professional Certificate programme. Demonstrated ability to design and document complete IT infrastructure solutions for small-to-medium businesses, including network architecture, user access control, backup strategies, and security policies. Committed to delivering accurate, well-documented, and professional IT support in a fast-paced environment.

KEY SKILLS

Operating Systems

- Ubuntu Linux 22.04 LTS
- Windows 10/11
- CLI Administration

Infrastructure

- NAS / File Servers
- Samba & OpenLDAP
- Backup & Recovery

Networking

- TCP/IP & Subnetting
- DNS / DHCP / VPN
- Wi-Fi 6 & Firewall Config

Software & Tools

- Google Workspace
- Bitwarden
- ClamAV / Malwarebytes

Security

- Cybersecurity Policies
- Incident Response
- Risk Assessment

Documentation

- Technical Writing
- Troubleshooting Guides
- IT Policies

EDUCATION

Google IT Support Professional Certificate | Coursera / Capaciti Tech Career Accelerator | 2025

- Modules: Technical Support Fundamentals, Computer Networking, Operating Systems, System Administration, IT Security.
- Capstone Project: Designed and documented a complete IT infrastructure solution for a 25-employee startup.

[Your Highest Qualification] | [Institution Name] | [Year]

- [Brief description of qualification, major subjects, or relevant achievement.]

CAPSTONE PROJECT EXPERIENCE

IT Infrastructure Design – Ubuntu Innovations (Pty) Ltd | Capaciti Capstone Project | May–Jun 2025

- Conducted a full business requirements analysis for a 25-employee Cape Town tech startup relocating to a new office.
- Designed a secure network topology including router/firewall, 24-port managed switch, and dual-band Wi-Fi 6 access points.
- Developed an IP addressing plan with four subnets (servers, user devices, printers, Wi-Fi) for departmental segmentation.
- Created a user and permissions matrix using Linux security groups (OpenLDAP) and a structured shared folder hierarchy.
- Produced a software inventory covering open-source and SaaS tools, reducing estimated monthly licensing cost to ~\$472 USD.
- Authored a Cybersecurity Policy, Risk Assessment Matrix, six-phase Incident Response Plan, and Security Awareness Training Programme.
- Documented a tiered Backup and Disaster Recovery Plan with defined RTO/RPO targets and offsite cloud storage strategy.

WORK EXPERIENCE

[Most Recent Role – e.g. IT Assistant / Helpdesk Technician] | [Employer Name] | [Start – End Date]

- [Describe a key responsibility or achievement relevant to IT support.]

- [Describe another relevant responsibility, e.g. troubleshooting, user support, hardware setup.]

[Previous Role] | **[Employer Name]** | *[Start – End Date]*

- [Key responsibility or transferable skill relevant to IT.]

CERTIFICATIONS & TRAINING

- Google IT Support Professional Certificate – Coursera (In Progress / Completed 2025)
- [Any other relevant certification, e.g. CompTIA A+, Microsoft AZ-900, Cisco CCNA Intro]

[Hiring Manager's Name]

[Job Title]

[Company Name]

[Company Address]

[City, Province, Postal Code]

Dear [Hiring Manager's Name / Hiring Team],

I am writing to apply for the position of [Job Title] at [Company Name], as advertised on [Platform/Website]. As a candidate currently completing the Google IT Support Professional Certificate through Capaciti's Tech Career Accelerator programme, I am eager to bring my technical knowledge, strong documentation skills, and genuine passion for IT support to your organisation.

What I Bring to the Role

Over the past four weeks, I have completed a comprehensive IT capstone project in which I designed and documented a full IT infrastructure solution for a simulated 25-employee Cape Town technology startup. This project required me to apply skills from five Google course modules — including networking, operating systems, system administration, and IT security — to produce real-world deliverables such as a hardware inventory, IP addressing plan, user permissions matrix, backup and disaster recovery plan, cybersecurity policy, and a six-phase incident response plan.

Through this work, I developed hands-on familiarity with Ubuntu Linux 22.04 LTS, command-line administration, network segmentation, OpenLDAP user management, and security awareness training design. I am comfortable documenting technical procedures clearly and professionally for both technical and non-technical audiences, and I understand the importance of accuracy, consistency, and attention to detail in IT support environments.

Why [Company Name]

I am particularly drawn to [Company Name] because [briefly mention something genuine about the company — e.g. its focus on innovation, its reputation for staff development, or the specific technologies it works with]. I believe this role aligns closely with my current skills and my ambition to grow into a well-rounded IT Support Specialist. I am a fast learner who takes initiative, and I am committed to contributing meaningfully from day one.

Closing

I would welcome the opportunity to discuss how my skills and project experience align with the requirements of this role. My CV is attached for your consideration, and I am available for an interview at your earliest convenience. Thank you for taking the time to review my application.

Yours sincerely,

[Your Full Name]
