

Week 3 Task 3: Risk Assessment Matrix

Risk	Likelihood	Impact	Mitigation
Phishing Attack	High	High	Employee awareness training and MFA
Ransomware	Medium	High	Regular backups, EDR, and antivirus protection
Hardware Failure	Medium	Medium	Redundant systems and scheduled maintenance
Power Outage	Medium	High	UPS devices and backup power planning
Data Breach	Low	High	Encryption, access controls, and monitoring
Insider Threat	Low	Medium	RBAC, audit logs, and user monitoring
Malware Infection	Medium	Medium	Endpoint protection and patch management
Internet Outage	Medium	Medium	ISP redundancy and failover planning

Risk Management Summary

Ubuntu Innovations (Pty) Ltd must prioritize protection against phishing attacks, ransomware, and power outages due to their potential impact on business operations. The implementation of cybersecurity controls, employee training, backups, and power protection measures will reduce organizational risk and improve business continuity.
