

Task 2: LinkedIn Profile Summary

Ubuntu Innovations (Pty) Ltd
Junior IT Support Specialist

1. LinkedIn Headline

Junior IT Support Specialist | Google IT Support Certified | Networking • Cybersecurity • Infrastructure

2. About / Profile Summary

□ Junior IT Support Specialist | Cape Town, South Africa

I'm a passionate and driven IT Support Specialist based in Cape Town, South Africa, with a strong foundation in networking, system administration, and cybersecurity. I recently completed the Google IT Support Professional Certificate and the Capaciti Tech Career Accelerator programme, where I built practical, job-ready skills through hands-on projects.

As part of my capstone project, I designed and documented a complete IT infrastructure solution for a 25-person technology startup — covering everything from VLAN network architecture and IP addressing to backup and disaster recovery planning, cybersecurity policy, and hardware procurement. This experience gave me real-world exposure to the responsibilities of an IT Support Specialist and taught me how to think critically under pressure.

What I bring to the table:

- Network design & troubleshooting (TCP/IP, VLANs, DNS, DHCP)
- Windows 10/11 & Ubuntu Linux administration
- Cybersecurity policy, MFA, and endpoint protection
- Backup & disaster recovery planning
- Clear technical documentation and stakeholder communication
- A growth mindset and passion for continuous learning

I'm actively seeking my first IT support role where I can contribute immediately while continuing to grow. If you're looking for someone reliable, technically capable, and eager to make a difference — let's connect.

Reach me at: [your.email@gmail.com]

3. Skills Section

Networking	Systems & Security	Tools & Soft Skills
